1. Executive Summary & Purpose

This Request for Proposal (RFP) defines the automated IT infrastructure monitoring requirements for the Core Banking Transaction C
Bidders must provide certified pricing for Site24x7 annual licensing covering all required hosts, network switches, web portals, and lo

1.1 Project Authority & Timeline

Issuing Entity: National Commercial Bank Information Technology Division.
RFP Reference: NCB-IT-2026-RFP-092.
All monitoring metrics must be strictly verified against official Site24x7 pricing tiers.

2. Infrastructure Sizing & Compute Roster

The Core Banking system runs on dedicated virtual and physical computing nodes:

Component Category	Detailed Specification	Bill of Materials Sizing
Host Server Fleet	40 Red Hat Enterprise Linux nodes for OLTP processing	40 Servers
Core Backbone Switches	6 redundant Cisco Nexus 9300 datacenter switches	6 Network Devices
Public Banking URLs	Retail NetBanking portal & corporate gateway	8 Websites
Synthetic Transactions	Multi-step funds transfer and login synthetic checks	4 Advanced Monitors

2.1 Exclusions & Non-Applicable Modules

Real User Monitoring (RUM) is out of scope for this procurement.
Synthetic checks outside the specified 4 user journeys are not required.

3. Log Aggregation & Compliance Mandate

Under regulatory banking guidelines (RBI / ISO 27001), transaction audit logs must be indexed and searchable.

3.1 Log Volume Specification

Estimated monthly log ingestion requirement: 500 GB logs per month.
Retention window: 30-day hot search index.

3.2 Summary Table for Vendor Quotation

- Host Server Monitors: 40 nodes
- Network Component Monitors: 6 switches
- Basic Website Monitors: 8 public URLs
- Advanced Synthetic Monitors: 4 transactions
- Monthly Log Ingestion: 500 GB logs
- RUM Pageviews: 0 (Explicitly excluded)
