AppLogs GB / month	50	4	+50	**54**	✓ Satisfied (+4)

SIZING & CALCULATION ASSUMPTIONS

- Priced against the quantities understood from the request — Advanced monitors: 4; Host monitors: 80; Network components: 15; RUM pageviews / month: 20,00,000; AppLogs GB / month: 50.
- All amounts are in INR for the IN market, billed annually.
- Currency was not stated explicitly; INR was inferred from the request and used in the calculation.
- Where an included quantity could not be verified from the supplied sources it was treated as zero, so any error in this quote overstates rather than understates cost.
- Add-on capacity is sold in whole packs, so delivered quantities may exceed the amounts requested.

COMMERCIAL EXCLUSIONS & SCOPE LIMITS

- Taxes, duties and levies — no verified tax treatment exists for this market in the active catalogue, so none has been applied.
- Discounts and promotional pricing — none are applied, including the unexplained discount visible in the reference screenshots.
- Onboarding, professional services, migration and training.
- Any monitoring capability not listed in the coverage table for the chosen option.
- Contractual terms, service-level commitments and quote validity periods — catalogue 2026.10.0-demo carries no authorised policy for these.
